preserving the planet.

## Who we are

### Abriso Jiffy: European leader in protective packaging and insulation

With 18 production sites across 12 countries, over 1,700 employees, and more than 5,500 customers, Abriso Jiffy is one of Europe's most comprehensive providers of protective packaging and insulation. Our expertise spans polyethylene (PE), polypropylene (PP), and polystyrene (PS) solutions, serving industries such as logistics, electronics, construction, and manufacturing.

### Our sustainable ambition

Abriso Jiffy's ambition is to be the most complete and sustainable provider of protective packaging and insulation in Europe. With a strong foundation, a unified team, and a forward-looking mindset, our company is well-positioned to meet the evolving needs of its customers—and the planet.

# Ocean Green®: our sustainable packaging brand

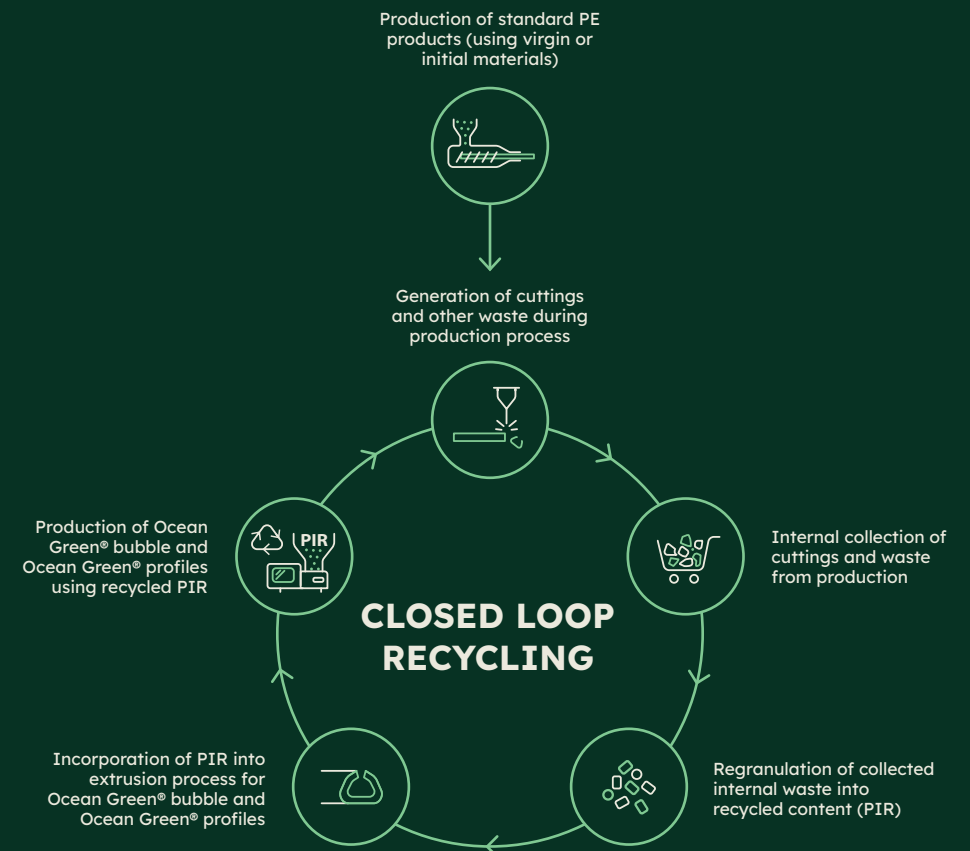

Ocean Green® is our answer to the growing demand for circular packaging solutions. In response to a pressing need to reduce plastic pollution and promote circularity in the packaging industry, Ocean Green® combines trustworthy performance with environmental responsibility. We offer recycled, recyclable, and certified packaging that protects both goods and the planet.

## For whom?

Ocean Green® is for companies that care about the planet, their impact, and the people they serve. Whether you're in logistics, electronics, construction or manufacturing, our packaging solutions are designed for businesses seeking robust, certified performance without compromising on sustainability. If your company values recycled materials and competitive pricing, Ocean Green® is committed to sustainability and circularity. Be part of making conscious choices and building a cleaner, greener future. You will reduce your carbon footprint and inspire your customers.

## How sustainable is Ocean Green®?

The PE resin, from which we produce our profiles and bubble wrap, is made of 70 to 100% recycled content. To create our profiles, we reuse the leftovers of the foam and process it into the end product. Our recycling process is both lean and green, enhancing sustainability at every step and reducing your carbon footprint. This approach lowers landfill waste and minimises the use of virgin raw materials. After use, the Ocean Green® material can be recycled, supporting a circular packaging model.

## Smart value in sustainable packaging

We believe in the power of the triangle: robust performance, environmental responsibility, and competitive pricing. Our products are certified, durable, and designed to outperform other packaging alternatives. We listen to our customers and offer smart value for your business and the planet.

### ✓ Certified recycled content

Robust, reusable packaging engineered for durability and trusted performance. We hold official Polycert certificates, which indicate the percentage of recycled content.

### ✓ Sustainable by design

We prioritise recycled and reusable inputs, creating a circular packaging model.

### ✓ Competitive pricing

Durable solutions at pricing that fits the customer's budget.

### ✓ Customer-centric solutions

We offer (tailored) packaging that goes with your workflow.

### ✓ Technical precision

Our packaging combines certified materials with uncompromising technical precision.

# Ocean Green® product range

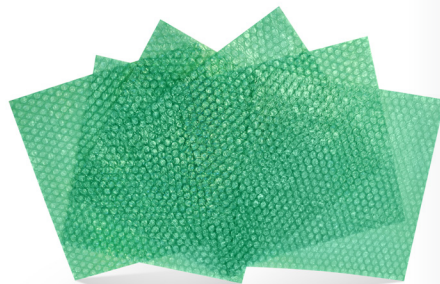

## Bubble wrap

Ocean Green® bubble wrap is a premium, shock-absorbing polyethylene (PE) film designed for wrapping, cushioning and protecting items during transit and storage.

70%  
RECYCLED  
CONTENT

### Ocean Green® bubble wrap offers more value

- ✓ Available in all shapes and sizes: rolls, sheets, bags, laminates and more — with variable bubble diameters, widths and lengths.
- ✓ Choose the correct specifications: bubble size, film thickness and width to match the required protection level.
- ✓ Wrap your item for transport: ensure it is cushioned, edges are covered, and unsecured voids are minimised.
- ✓ Custom development via our R&D team: choose options such as antistatic bubbles for electronics, food-proof versions and laminated variants (bubble + foam, paper, etc.) for extra barrier protection.

## Protection profiles

AbriProfile® and AbriCorner® Ocean Green® protective profiles are high-quality polyethylene (PE) foam profiles designed to protect products against impacts, scratches, and other types of damage.

100%  
RECYCLED  
CONTENT

### Ocean Green® protection profiles offer more value

- ✓ Select the profile type that best suits your product: for example, straight protection along the long sides, U-profiles around the edges, or corner profiles for sharp corners.
- ✓ Set the correct density and length: the standard length is 2 m, but custom dimensions are available.
- ✓ Easily attach the profile to the product or packaging surface — optionally with adhesive strips, perforations or V-cuts for quick assembly.
- ✓ Use the profiles during transport or storage to keep valuable goods safe, such as furniture, pipes, delicate equipment, or industrial components.

# Position your business ahead of the (sustainable) curve

Enterprises face the need for efficient packaging, rising sustainability demands and cost pressures. Ocean Green® meets these demands. Choosing visibly sustainable packaging sends a strong signal to customers and stakeholders. It's a competitive advantage in an increasingly eco-aware marketplace.

## Sustainability is the heart of the matter

At Abriso Jiffy, sustainability isn't a catchphrase—it's the foundation of every decision. The Ocean Green® label features packaging solutions made entirely from recyclable and post-industrial recycled (PIR) materials, including bubble wrap and profiles. Our company engineers all its products to be completely recyclable and operates a closed-loop system that recovers and reuses all production waste. So you can reduce your carbon footprint and future-proof your business.

## What's in a name?

Ocean Green® stands for our commitment to reducing environmental impact, particularly plastic pollution in the ocean. While we maintain high quality, sustainability, competitive pricing, customisable formats and technical precision, we hope our packaging solutions inspire you to choose for a green future, with 100% recyclable products, without compromise. Are you ready to position your business ahead of the (sustainable) curve? Join us in shaping a circular future!

## Good to know

We're preparing for the EU's Packaging and Packaging Waste Regulation (PPWR), which will require 35% post-consumer recycled content. Our Ocean Green® line already leads the way, and we're working toward full PCR integration by 2030.

## Ocean Green® by Abriso Jiffy

We protect what matters—your products and the planet. Our packaging solutions are more than materials; they're a mindset. Join us in shaping a circular future and meet customers' demands!

## Let's talk about your needs

Ready to upgrade your packaging? Contact Abriso Jiffy for a quote, a custom solution, or to discuss how Ocean Green® bubble wrap or protection profiles can fit your transportation line and sustainability strategy.

We have all the answers for your sustainable packaging. Order samples. Request custom formats. We're here to help.
